

**PSYB12-143 NEUROLOGY**

**Credits:** 2

**Number of lessons per week:** 2

**Type:** Lecture

**Description of the subject:**

The goal of the course is to provide information on the most important issues concerning the diagnosis and treatment of the central and peripheral nervous systems. Examination of the patient and diagnostic procedures will be discussed followed by evaluation of cerebrovascular, neurodegenerative, and inflammatory disorders, epilepsy, metabolic disorders, pain syndromes, tumours, and traumas.

**Required readings:**

Lindsay, K. W., Bone, I., & Callander, R. (1986/newer). *Neurology and Neurosurgery Illustrated*. Edinburgh: Churchill Livingstone.
